CHECKLIST FOR RESIDENTIAL BED BUG TREATMENT (PRODUCT ONLY)

The following checklist outlines the steps you should take to prepare for the successful remediation of a bed bug infestation in your home/apartment. All items will be examined by the treating technician(s).

- **All** clothing and bed linens should be laundered, dried and placed in plastic bags prior to treatment. You should select the clothing you will wear on the date of treatment and place it in the dryer for one hour on high heat, then place in sealed bag until needed.
- All pillows, cushions, bed frames, mattresses, cabinets and desks should remain in the home for treatment. Please leave as much furniture in your home/apartment as possible. Successful remediation involves treatment of all possible items.
- One-of-a-kind items, such as heirlooms, and any irreplaceable items should **always** be removed from the premises prior to treatment. Items should be inspected by the treating technician prior to removal from your home/apartment.
- All trash should be placed in bags/containers and removed from the house/apartment.
- All clutter should be removed and discarded prior to treatment. It is impossible to provide a thorough treatment for the control of bed bugs in cluttered conditions.

Our office will call to schedule a 28-day follow-up service to reinspect and/or retreat as needed.

Please be aware that if treatment is scheduled, all residents and all pets will need to be out of the house during treatment and up to four (4) hours after technician has finished treating.

ADVANCE Termite & Pest Control reserves the right to refuse to provide treatment if your home or apartment is not properly prepared before the scheduled treatment date. In such event, a \$50.00 rescheduling fee may be charged.
